

Application

- Compact Portable Sound Reinforcement
- Medium Format Fixed Installation

Features

- 1000w Peak Power Handling (500w Program, 250w AES)
- High Sensitivity
- Multiple Rigging Points
- 90 x 40 (Horizontal x Vertical) Dispersion Pattern
- Superior Time Domain Performance

The P.Audio XT-12 is a compact professional sound reinforcement system designed for both foreground and background applications. The 12 inch (305mm) low frequency woofer offers extended low frequency response in a narrow profile design. The large 44mm compression driver with titanium diaphragm, coupled to the aluminium 90x40 horn offers superb transient response and controlled dispersion. The XT-12 is ideal for fixed installation applications such as restaurants, bars and general purpose public address and full range music systems.

The XT-12 is a full range design that employs 3rd order passive networks for excellent summing and balance for the individual components and offering a higher degree of reliability. The power handling is rated at 250w continuous with a peak input power capability of 1000 watts. System impedance is rated at 8 ohms.

The enclosure is a very high quality plywood and finished in a very durable polyurea coating. The system includes a top hat system and an optional U bracket to allow fixed installation. The XT-12 may also be suspended using the P.Audio M10 Eye Bolt Kit. The XT-12 is a very high performance design that features simple mounting options for use in a variety of indoor applications.

General Specifications

Frequency Response (-10dB)	55Hz - 20kHz
Sensitivity (1w/1m)	95dB
Maximum Peak SPL	126dB
Dispersion(H x V)	90° x 40°
LF Components	12" Woofer
HF Components	1.7" Compression Driver
Input Impedance	8 Ohm
Connections	2 X Speakon Connectors
Power Handling	250w Continuous 500w Program 1000w Peak
Net Weight	18.6 kg / 41 lbs
Dimensions (HxWxD)	583x332x338.4 mm 23x13.1x13.3 inch
